**BOLDED** Chemical Name: Part of 2014 Update Set

- Bolded with asterisk\*: REVISED chemical
- Bolded without asterisk: NEW chemical

\*\* Addendum published in 1999 with new 10-minute values (ERPG-1: 2 ppm; ERPG-2: 50 ppm; ERPG-3: 170 ppm)

NA† = not appropriate

ID‡ = insufficient data

⊛ = Odor should be detectable near ERPG-1. (See introductory text “ERPG-1 Odor Detection Indicator and Objectionable Odor.”)

Lower Explosive Limit (LEL) Notations for ERPG values:

100% or more LEL = ***Bold Red Italics Underlined***

50–99% LEL = ***Bold Red Italics***

10–49% LEL = **Bold Red**

<10% LEL = Regular Font

\*\*\*LEL Column: CAUTION--If LEL value is shown, one or more ERPG values are 10% LEL or more. The lack of an entry in the LEL column should not be interpreted that the chemical is not flammable, but only that the ERPG values for that chemical do not exceed 10% of the LEL. (See introductory text “Lower Explosive Limit Warnings”.)

NOTE: This information includes all approved ERPG values as of March 2014. ERPG documents reviewed, balloted, and approved by the Committee after this date will be eligible for inclusion in the 2015 ERPG Document Set.
